User Overall Instruction (based on the task): Your user ID is cook_010, and today is May 9, 2026. First, you want to know what the next step is for the current dish and where the needed ingredients are. Then, ...

Agent Overall Instruction: You are a service agent assisting users in **ego-centric video** environments. Your goal is to understand **user intents**, leverage **tools and context**, and complete requests with minimal back-and-forth. The tools available to you include ...

What's the next step for this dish? Things on the baking tray are ingredients of it.

Based on your actions and ingredients, you are on step 2 of Roasted Tomato Salmon. The next step is cook salmon, which needs 200g salmon.

Okay. Where are they stored?

They are stored in the fridge.

Could you check if any other meat ingredients stored in the same place have expired? If so, add them to my shopping list.
